PROFILE SUMMARY

Indie SaaS Builder and Multi-Product App Developer with 11 years of professional experience. Built and published 20+ real-world applications across business, finance, legal, and utility domains. Focused on offline-first architecture, scalable product design, and practical user solutions.

SKILLS

• Flutter Development • Web Development (HTML, CSS, JavaScript)
• Firebase Backend • Offline-first Architecture
• AI-assisted Development (ChatGPT, Cursor AI)
• GitHub & Vercel Deployment • Product Thinking

PRODUCT PORTFOLIO

Total Products Published: 20+
Developed and published multiple production-ready applications across categories:

• Business & Finance Tools – Invoice systems, expense trackers, admin dashboards
• Legal & Documentation Tools – Document builders and structured templates
• Service & Booking Systems – Offline booking and workflow tools
• Utility Apps – Secure storage, approval systems and productivity tools

FEATURED PRODUCT

CineLedger – Freelancer SaaS (Live)
A subscription-based billing and client management SaaS built with Firebase and Vercel. Includes invoice system, proposals, analytics, and offline-first data handling.

EXPERIENCE

Knitting Supervisor (2014 – Present)
Managed production operations, ensured quality control, and maintained high execution consistency over 11 years.

EDUCATION

Bachelor of Business Administration (BBA) – 2011 to 2014

GOAL

To build and scale SaaS products and transition into a full-time independent app creator.
